

DRUGCOAT® – Methacrylic co-polymer based pharma polymers is suitable for enteric coating, protective coating, taste Masking, and **sustained release formulation**

- DRUGCOAT L & S series – Enteric coating formulation
- DRUGCOAT E series – Taste masking and protective coating formulation
- DRUGCOAT RL & RS series – Sustained release formulation
- DRUGCOAT NE series – Aqueous Sustained release formulation

AQUAPOL® polymer is an acrylic emulsion capable of suspending, stabilising, thickening, and improving the appearance of high surfactant-based cleansing products.

- AQUAPOL SF-1
- AQUAPOL SF-2
- AQUAPOL SF-22
- AQUAPOL 940

APION: An-Ion Exchange Cross Linked Polymers are effective and safe excipients providing Formulation flexibility and offering a unique solution to formulation problems like Disintegration and Taste masking of bitter API.

- APION T Series – Taste Masking – Cross Linked Polymers
- APION D Series – Disintegrant – Polacrillin Potassium
- APION A Series – Active Pharmaceutical Ingredient
